
Low Tech Tips with VELCRO!!!

Some ideas from www.ceativecommunicating.com

1. Velcro toys to a table for stability.
2. Create a Velcro-sensitive wrist band. Students can stick props to the wristband for a wrist puppet.
3. Velcro props to a storybook for a 3D effect.
4. Place Velcro on the bottom of a wooden dowel to pick up toys.
5. Create a Velcro sensitive glove for children to pick up toys.
6. Place Velcro on book pages to make it easier for kids to turn the pages.
7. Create a Velcro vest by using a section of Velcro sensitive material, cutting a hole for the head and attaching the sides with tow strips of Velcro.
8. Velcro student's individual schedules to the wall.
9. Use Velcro straps for hanging toys from swings and car seats.
10. Velcro symbols onto switches.
11. Velcro your pen and other items that are easily lost to you desk.
12. Velcro communication devices to your student's desk/wheelchair tray.
13. Use the loop side of Velcro on boards/books/switches (anything that is stationary) and the hook side of Velcro to removable pictures/objects (anything that is removable).
